Hypnosis is a scientifically verified and effective technique that can promote accelerated human change. The AmPac Accelerated Weekend programs will teach you how to stimulate desired changes in behavior and encourage mental and physical well-being. During this first weekend, you will already learn how to guide yourself and others to lose weight, quit smoking and be free of physical pain. These programs are especially suited for health care professionals, practicing therapists, and individuals seeking to make a positive change in their lives.

The AmPac Accelerated Hypnotherapy Course will teach you how to use hypnosis to stimulate desired changes in motivational behavior. Through a series of fascinating discussions, informative demonstrations, and interactive exercises, you will be using hypnosis after only one weekend. At the end of the weekend, you will be given one textbook and a written examination to complete at home. To complete the course, simply complete the exam, using your textbook for reference, and return it to The Association for Integrative Psychology (AIP).
